## Experience

### Full Stack Developer

Make it Real | 2021 - 2022

### MarktPul Project

- Worked on MarktPul, a web application where anyone can register, browse and search through the second-hand product offering that were previously uploaded by other sellers . The buyer adds the products to a shopping cart and finally pays and receives home delivery
- Developed the Landing Page with descriptions about the web page, banner and products
- Wrote a database layer for events, products and users by using Stored Procedures in MongoDB
- Coded a interface to proceed with payments using credit card on Epayco and built the UI to make a payment
- Elaborated multiple visual elements by translating UI/UX design wireframes into code. Images were uploaded to Cloudinary

**Stack Front-end** React, Redux

**Stack Back-end** NodeJS, MongoDB, Express, SendGrid, JWT, Bcrypt, Epayco

### Repositories

Front-end ([github.com/Mariana-Usuga/MarktPul-F](https://github.com/Mariana-Usuga/MarktPul-F))

Back-end ([github.com/jocdiazm/MarktPul-B](https://github.com/jocdiazm/MarktPul-B))

### Deployments

Front-end ([marktpulf.netlify.app](https://marktpulf.netlify.app))

Back-end ([marktpul-bk.herokuapp.com](https://marktpul-bk.herokuapp.com))

### U Dance Project

- Wrote a web application for management of group classes for any kind of school, initially developed for dance schools. The app has two profiles: a director's role, which can have a profile to create and manage dance courses, and a student's role, to select courses and pay them.

**Stack Front-end** React, Redux, Tailwindcss, Auth0, Cypress

**Stack Back-end** NodeJS, MongoDB, Express, JWT, Epayco, Cloudinary

### Repositories
