Medellin, Colombia | [LinkedIn](#) | +57 317-701-98-62 | musugamontoya@gmail.com

SUMMARY

- Full Stack Developer with a strong background in Flutter, Angular, ReactJs, MongoDB, Java, and Node.js. Familiar with RESTful APIs and experienced in developing eCommerce and process management web applications. Proficient in using Redux, Tailwind CSS, and JWT. What sets me apart is my ability to communicate effectively, solve problems efficiently, and quickly learn new technologies in constantly evolving work environments.

EXPERIENCIA

DMS Software

Medellín, Colombia

Frontend Developer

October 2023 - Present

- Currently working with Flutter to develop an order management application for a warehouse.
- The application allows the warehouse manager to view their assignments and available products, improving inventory management and control through barcode scanning. By streamlining the process of registering and updating inventories, I ensured that the application is intuitive and easy to use, providing an optimized user experience.

It Team Corp

Medellín, Colombia

Full Stack Developer

June 2022 - January 2023

- Crafted a static web application to organize commercial proposals and document completed projects, utilizing Angular, Java (for REST API), and PostgreSQL.
- Designed a web user interface in JavaScript to access and store data in DynamoDB, manage files in S3, and present results intuitively.

Make It Real

Medellín, Colombia

Full Stack Developer

August 2021 - October 2021

- Contributed to MarktPul development, a web platform for buying and selling second-hand products, employing Redux, Tailwind CSS, NodeJs, Express, MongoDB, JWT, Epayco, and Bcrypt.
- Created a web application for dance school process management with distinct director and student profiles, facilitating course creation, enrollment, and payment.

EDUCATION

Instituto Tecnológico Metropolitano

Medellín, Colombia

Software Development

2020 - Present

- Acquired knowledge in Java for object-oriented programming, gaining a solid foundation in programming principles.
- Studied relational database concepts to effectively manage and organize data.
